## GET PROACTIVE ABOUT WORK ZONE SAFETY

In 2019, an estimated 39,000 injuries were reported as a result of motor vehicle crashes in work zones nationwide. Fortunately, most crashes in construction zones are preventable if you follow the tips below.

- » **Be Alert** — Dedicate your full attention to the road and your surroundings in the work zone.
- » **Adjust Your Speed** — Speeding accounted for more than 26% of all traffic fatalities in 2019, killing 9,478 people.
- » **Don't Tailgate** — Rear-end collisions are the most common type of work zone crashes.
- » **Expect the Unexpected** — Be aware of workers and their equipment.
- » **Minimize Distractions** — Avoid changing the radio, eating, or touching electronics.

### DO YOU KNOW THE SIGNS?

A lane will shift slightly toward the left or right of the roadway, but the route is otherwise unchanged.

There's road work ahead. Be on the lookout for unusual driving conditions.

A construction flagger is ahead. Be prepared to stop and follow instructions.

Motorists will need to take an alternate route.

A lane will soon end, requiring its motorists to merge into the adjacent lane.

The end of the work zone has been reached. Resume regular safe driving habits.

# EYES BEFORE ELECTRONICS — FLORIDA WORK ZONES ARE HANDS-FREE ZONES

Effective October 1, 2019 you cannot hold a wireless device in your hands if you are in a school zone or an active work zone with workers present. The Florida Department of Highway Safety and Motor Vehicles (FLHSMV) will allow you to use Bluetooth or a hands-free device as an alternative.

According to the National Highway Traffic Safety Administration, 3,142 people were killed by distracted driving in 2019.

## TEXTING WHILE DRIVING IS A PRIMARY OFFENSE IN FLORIDA

Florida law prohibits texting, emailing and instant messaging while driving. Doing so is a primary driving offense.

FLHSMV, along with the Florida Department of Transportation (FDOT), statewide law enforcement, and other highway safety partners, is conducting a statewide campaign, called Put It Down: Focus on Driving, to raise awareness of and encourage compliance with the Wireless Communications While Driving Law. You can follow the campaign on social media with the hashtags #PutItDown and #FocusOnDrivingFL.

Driving distracted can not only hurt you and your passengers, but it also puts everyone on the road in danger. Remember to drive alert and avoid distractions while driving.

Visit [flhsmv.gov/focusondriving](http://flhsmv.gov/focusondriving) for additional resources and information.

Focus on driving.
