

I-4 and Lee Road Interchange Enhancements Keep Traffic Moving

I-4 Ultimate has made major improvements to the Interstate 4 (I-4) and Lee Road (State Road 423) interchange to reduce congestion and ease local access to and from the interstate. The project lengthened each interchange ramp and added a lane to each exit ramp to improve capacity and traffic flow. A westbound I-4 Express entrance and an eastbound I-4 Express exit give motorists the opportunity to move between I-4 Express and the general use lanes just north of the interchange. Diplomat Circle, which runs behind a local hotel, is now connected to the traffic signal at the intersection with Lee Road (not pictured).

- 1 I-4 Ultimate lengthened the I-4 entrance and exit ramps at the interchange to increase capacity and give motorists more time to enter or exit the interstate.
- 2 The westbound I-4 exit ramp and the eastbound I-4 exit ramp each gained an additional lane, improving motorists' access to the turn lanes at the end of each ramp.
- 3 An additional left turn lane on eastbound Lee Road to the eastbound I-4 entrance ramp mitigates congestion under I-4 while allowing more motorists to use the ramp.
- 4 An entrance ramp to I-4 Express from westbound I-4 and an exit ramp from I-4 Express to eastbound I-4 just north of Lee Road (not shown) give drivers a new option for more reliable travel times.
- 5 The left turn lane on eastbound Lee Road to northbound Wymore Road was separated from the two through lanes to reduce weaving and enhance safety.
