New Traffic Pattern Begins July 10 at Interstate 4 and County Road 532 Interchange

The Florida Department of Transportation (FDOT) is transforming the Interstate 4 (I-4) and County Road (C.R.) 532 interchange near ChampionsGate into a diverging diamond interchange (DDI). A new traffic pattern will begin at the interchange as soon as Sunday, July 10. See the reverse side for more information about the benefits of a DDI.

1 Traveling Through the Interchange on C.R. 532:
- Proceed through the traffic light and continue in your lane as it shifts to the left side of the road
- After passing under I-4, your lane will shift back to the right side at the next traffic signal

2 Entering Eastbound I-4 from Eastbound C.R. 532:
- Keep left as you approach the interchange
- Proceed through the traffic light and continue in your lane as it shifts to the left side of the road
- Turn left on the ramp to eastbound I-4

3 Entering Eastbound I-4 from Westbound C.R. 532:
- Keep right as you approach the interchange
- Turn right on the ramp to eastbound I-4

4 Entering Westbound I-4 from Eastbound C.R. 532:
- Keep right as you approach the interchange
- Turn right on the ramp to westbound I-4

5 Entering Westbound I-4 from Westbound C.R. 532:
- Keep left as you approach the interchange
- Proceed through the traffic light and continue in your lane as it shifts to the left side of the road
- Turn left on the ramp to westbound I-4

6 Exiting Eastbound I-4 to C.R. 532:
- Take Exit 58 to C.R. 532
- Turn right at end of ramp for eastbound C.R. 532 or left for westbound C.R. 532

7 Exiting Westbound I-4 to C.R. 532:
- Take Exit 58 to C.R. 532
- Turn left at end of ramp for eastbound C.R. 532 or right for westbound C.R. 532

Motorists should expect an overnight closure of C.R. 532 for construction and lane striping as soon as Saturday, July 9. For detour information, please visit i4Beyond.com/detours.

Diverging Diamond Interchange Moves Traffic Efficiently

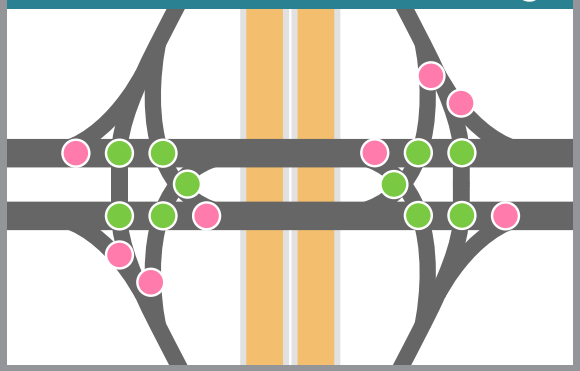

The diverging diamond interchange (DDI) eliminates left turn phases at traffic signals. It also reduces the number of traffic signal phases from four to two phases. The DDI will move almost double the traffic through the intersection in the same time.

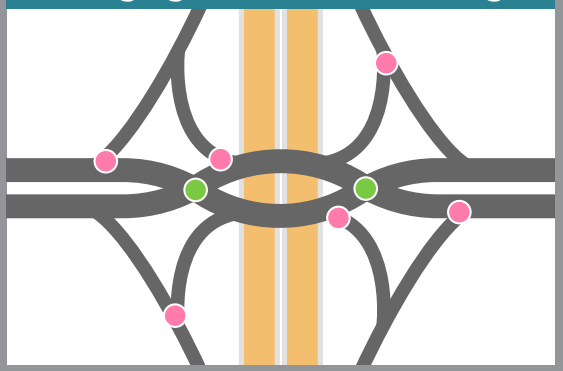

DDI Reduces Conflicts

The DDI enhances safety by reducing conflict points — areas where vehicles can cross paths — and allowing left turns that do not cross oncoming traffic. When compared to a conventional diamond interchange, the DDI reduces the number of conflicts of crossing and merging traffic by more than half.

Conventional Diamond Interchange

Diverging Diamond Interchange

	Conventional Diamond Interchange	Diverging Diamond Interchange
Crossing	10	2
Merging	8	6
Total	18	8
