Construction Beginning at I-4 and C.R. 532 near ChampionsGate *Osceola County interchange to be reconfigured to Diverging Diamond*

OSCEOLA COUNTY, Fla. – The Florida Department of Transportation (FDOT) has begun work to transform the Interstate 4 (I-4) and County Road (C.R.) 532 interchange near ChampionsGate into a Diverging Diamond Interchange (DDI) as part of the I-4 Beyond the Ultimate project.

Work on the reconfiguration, which will improve the safety and efficiency of the interchange, began this week.

Unlike a conventional interchange, the lanes in a DDI cross over to the left side of the roadway. This increases safety by reducing the number of locations in which motorists could potentially cross paths. For example, the design allows drivers to make a left turn without crossing in front of oncoming traffic. The number of signal phases are also reduced in a DDI, allowing more motorists through the interchange.

In addition to the interchange reconfiguration, the work at I-4 and C.R. 532 will include expanding the eastbound and westbound I-4 entrance and exit ramps and reconfiguring the intersection of ChampionsGate Boulevard and Goodman Road.

The project will also add bike lanes and sidewalks along C.R. 532 for improved bicycle and pedestrian connectivity and safety.

To keep up with construction activity throughout the duration of the interchange improvement project, please visit cflroads.com or [follow the project on Twitter](#).

Media inquiries should be directed to the FDOT District Five Communications Office at FDOT-D5Comm@dot.state.fl.us or by phone at 386-943-5593.

The Florida Department of Transportation's mission is to provide a safe transportation system that ensures the mobility of people and goods, enhances economic prosperity, and preserves the quality of the state's environment and communities. The department is committed to building a transportation system that not only fits the current needs of Florida's residents and visitors, but also enhances mobility throughout the state to accommodate its consistent and rapid growth. The unique nature of the Sunshine State and its year-round warm climate provides numerous opportunities to achieve the department's mission through multiple transportation modes including highways/streets, air, rail, sea, spaceports, transit, and the ever-expanding deployment of bicycle & pedestrian facilities.
